# KYTE RECYCLING RECEPTACLE

paper

litter

bottles & cans

*(from left to right)* Shown with paladin silver (sg)(m) powdercoated steel lid, sky blue (g) powdercoated steel body, white (g) vinyl body graphics, paper receptacle type, and slim rectangle opening. Shown with orange (g) powdercoated steel lid, orange (g) powdercoated steel body, white (g) vinyl body graphics, litter receptacle type, and downward triangle opening. Shown with chartreuse (g) powdercoated steel lid, paladin silver (sg)(m) powdercoated steel body, black (g) vinyl body graphics, bottles & cans receptacle type, and round opening.

Versatile and modern, Kyte is our à la carte recycling system. Available with many powdercoat colors, graphics, and openings allow you to customize and group as many Kytes as desired based on need. With our wide array of options, you can be assured refuse and recyclables are properly and easily disposed of. Suitable for indoor and outdoor environments allows the Kyte recycling system to be implemented anywhere. Kyte is constructed of durable steel with fully welded features. A sturdy 32 gallon plastic liner provides ample space for collecting bottles, cans, paper, aluminum and other materials. Liners have a rolled continuous handle that makes removal a breeze. Receptacles are serviced by removing the lid and pulling the liner straight out through the top. A central anchor and 4 separate levelers ensure proper and secure installation. We also offer a wall mount option for lower traffic areas or where floor space is limited.

## installation & maintenance

Units come preassembled and ready for installation. Tamper-proof stainless steel mounting hardware is provided to securely anchor product in place. Powdercoated surfaces can be cleaned using a clean, soft, non-abrasive cloth with warm water and mild detergent. Other commercially available all-purpose cleaners such as Simple Green ® can be used to clean and protect all surfaces. Denatured alcohol and a clean, soft, non-abrasive cloth can be used to clean oils left on all stainless steel surfaces. Commonly available cleaners such as Weiman ®, Zep ®, 3M ®, Simple Green ®, and other stainless steel cleaners can also be used to clean and protect all stainless steel surfaces. Avoid abrasive cleaners and cleaners containing chlorine on all surfaces.

specifications subject to change without notice

These are the standard material and finishing options we offer for customization. Every component can be customized to suit your vision. The modularity lends itself to multiple and exciting design configurations that can be tailored to an individual's taste. For options such as powdercoating, give us a call - we have an array of colors to choose from. If you have a unique finish or exotic material in mind for a certain component that we do not list, let us know and we may be able to implement it into your design.
